

1st component:  
Top Banner

2nd component:  
Button

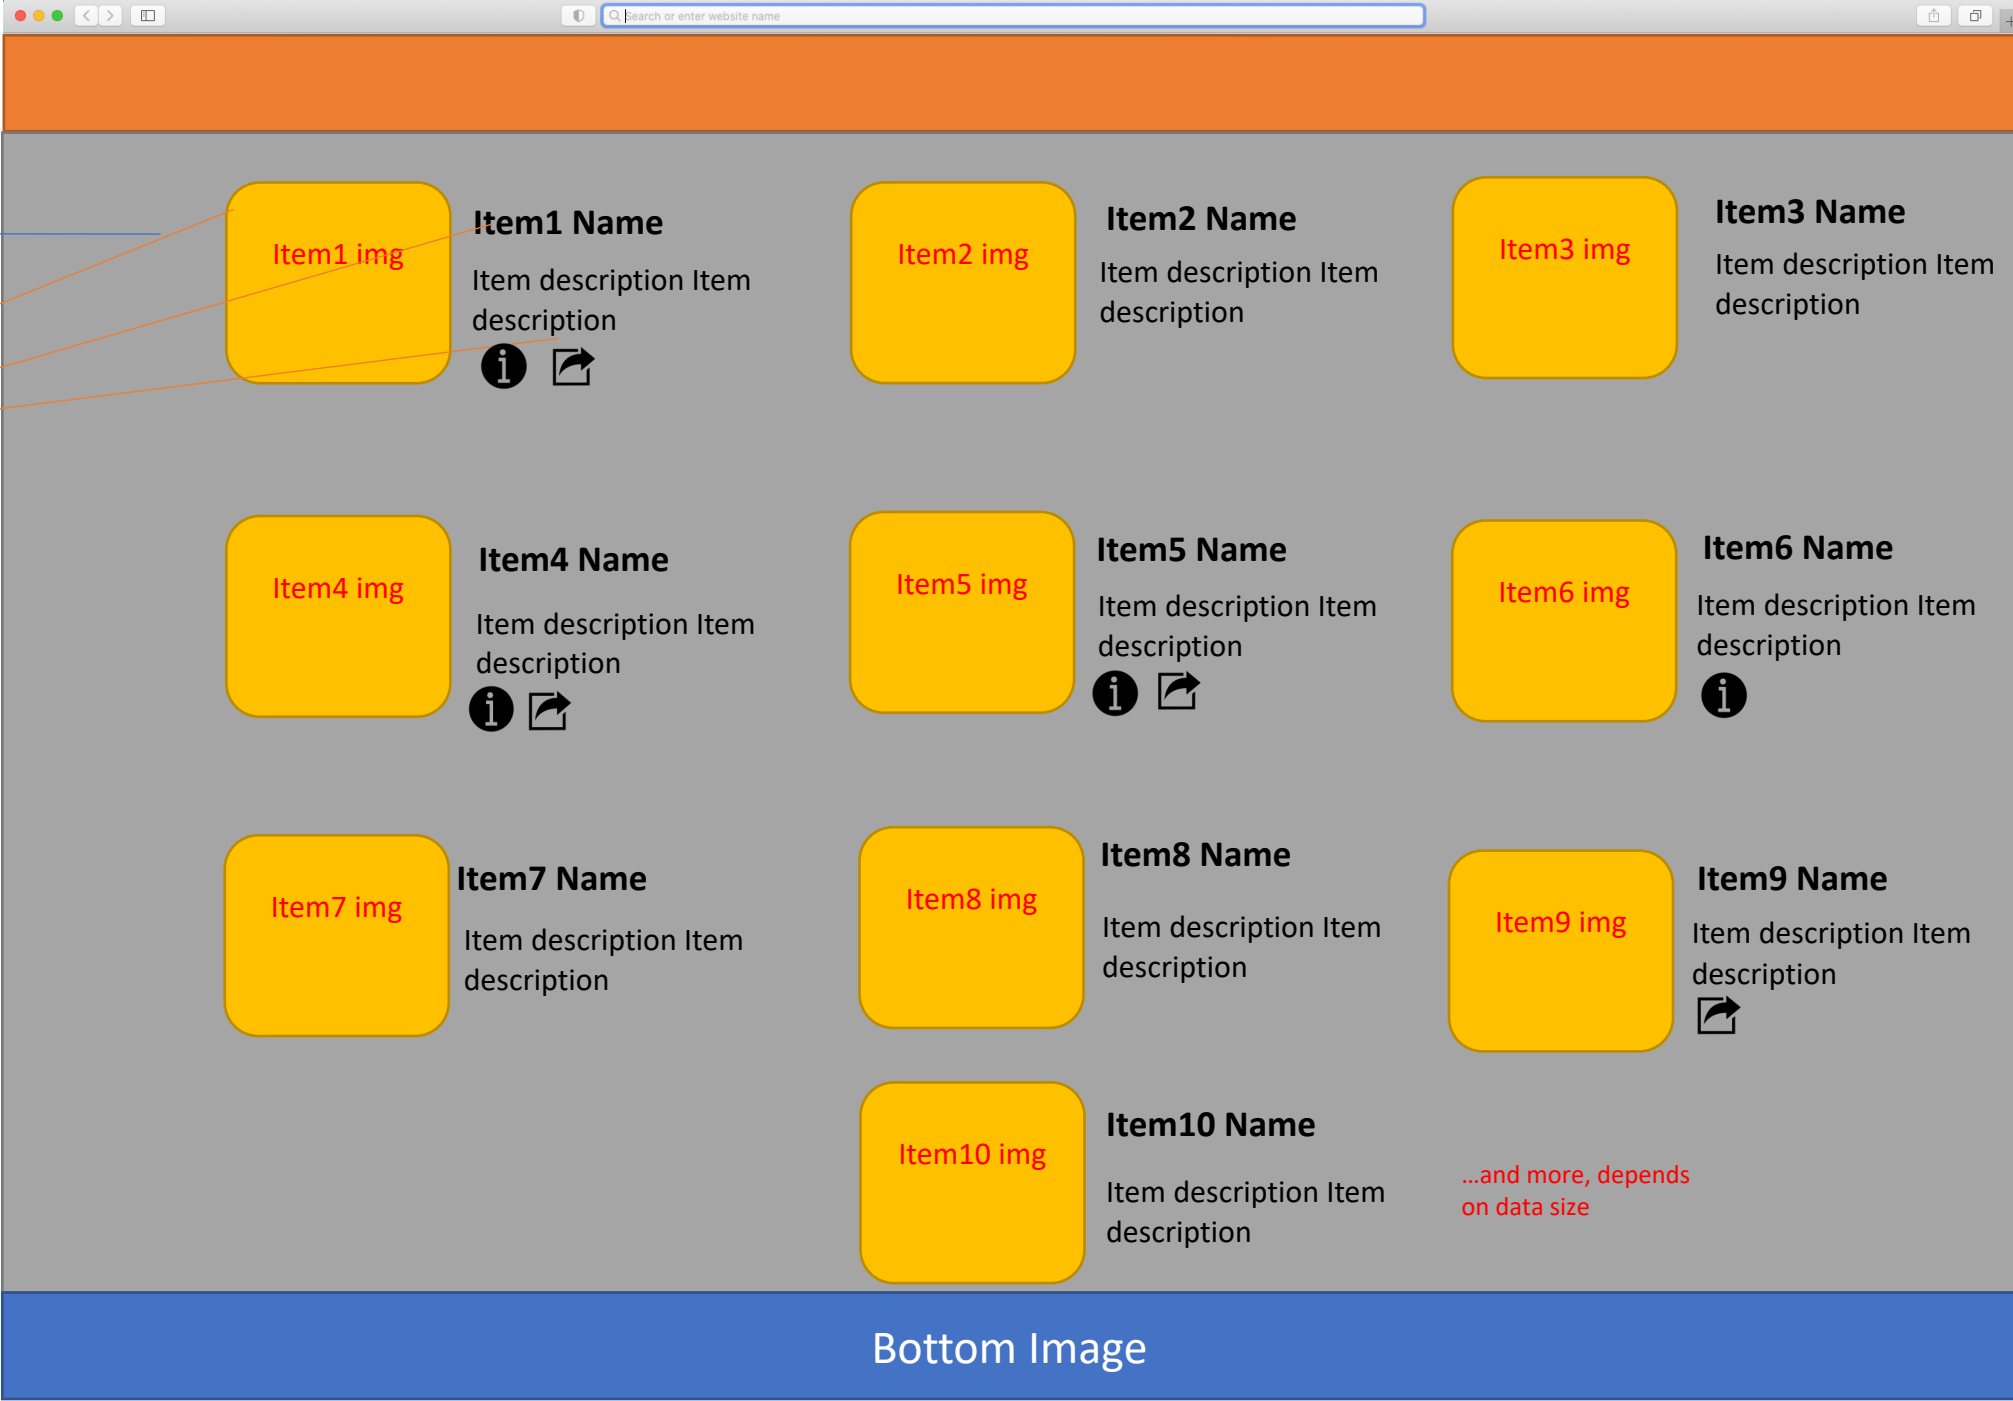

3rd Component  
(Large Image)

Scroll down

4<sup>th</sup> Component -  
Merchandise display  
(set this section's background  
color to grey )

This section will be used  
to display all  
merchandises.  
Merchandises  
information will be from  
an api call in javascript  
function, that api will  
return a string in json  
array format (see  
examples in next page)  
you don't need to worry  
about that function call.  
Just store the example  
value I give (next page)  
in a function, assume  
that's the result from the  
api and show the data.

5<sup>th</sup> Component  
Bottom image

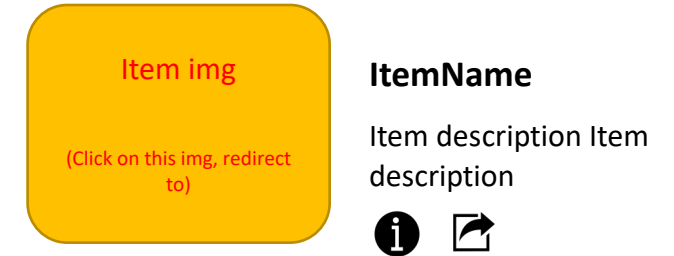

## Example data you can use:

```
{ "generalInfo":{ "category":"Category1","name":"ItemName1"},  
linkOff":"http://www.test.com","imageUrl":"http://www.test.co  
m"},"description":"Item description Item  
description."},"infoLink!":"http://www.test.com","shareLink!":"http  
://www.test.com"),{"generalInfo":{"category":"Category1","nam  
e":"ItemName2"},"linkOff!":"http://www.test.com","imageUrl":"h  
ttp://www.test1.com"},"description":"Item description Item  
description."},"infoLink!":"http://www.test.com","shareLink!":"htt  
://www.test.com"),{"generalInfo":{"category":"Category1","nam  
e":"ItemName3"},"linkOff!":"http://www.test.com","imageUrl":"h  
ttp://www.test2.com"},"description":"Item description Item  
description."},"infoLink!":"http://www.test.com","shareLink!":"http  
://www.test.com"),{"generalInfo":{"category":"Category3","nam  
e":"ItemName4"},"linkOff!":"http://www.test.com","imageUrl":"h  
ttp://www.test3.com"},"description":"Item description Item  
description."},"infoLink!":"http://www.test.com","shareLink!":"http  
://www.test.com"),{"generalInfo":{"category":"Category2","nam  
e":"ItemName5"},"linkOff!":"http://www.test.com","imageUrl":"h  
ttp://www.test4.com"},"description":"Item description Item  
description."},"infoLink!":"http://www.test.com","shareLink!":"http  
://www.test.com"),{"generalInfo":{"category":"Category2","nam  
e":"ItemName6"},"linkOff!":"http://www.test.com","imageUrl":"h  
ttp://www.test5.com"},"description":"Item description Item  
description."},"infoLink!":"http://www.test.com","shareLink!":"http  
://www.test.com"),{"generalInfo":{"category":"Category3","nam  
e":"ItemName7"},"linkOff!":"http://www.test.com","imageUrl":"h  
ttp://www.test6.com"},"description":"Item description Item  
description."},"infoLink!":"http://www.test.com","shareLink!":"http  
://www.test.com"),{"generalInfo":{"category":"Category3","nam  
e":"ItemName8"},"linkOff!":"http://www.test.com","imageUrl":"h  
tp://www.test7.com"},"description":"Item description Item  
description."},"infoLink!":"http://www.test.com","shareLink!":"http  
://www.test.com"),{"generalInfo":{"category":"Category3","nam  
e":"ItemName9"},"linkOff!":"http://www.test.com","imageUrl":"h  
tp://www.test8.com"},"description":"Item description Item  
description."},"infoLink!":"http://www.test.com","shareLink!":"http  
://www.test.com"),{"generalInfo":{"category":"Category3","nam  
e":"ItemName10"},"linkOff!":"http://www.test.com","imageUrl":"  
http://www.test.com"},"description":"Item description Item  
description."},"infoLink!":"http://www.test.com","shareLink!":"http  
://www.test.com")}]
```

In JSON format, it looks like:

```
1 {
  "generalInfo":{
    "category":"Category1",
    "name":"ItemName1"
  },
  "linkOff":"http://www.test.com",
  "imageUrl":"http://www.test.com",
  "description":"Item description Item description.",
  "infoLink":"http://www.test.com",
  "shareLink":"http://www.test.com"
},
{
  "generalInfo":{
    "category":"Category1",
    "name":"ItemName2"
  },
  "linkOff":"http://www.test.com",
  "imageUrl":"http://www.test1.com",
  "description":"Item description Item description.",
  "infoLink":"http://www.test.com",
  "shareLink":"http://www.test.com"
},
{
  "generalInfo":{
    "category":"Category1",
    "name":"ItemName3"
  },
  "linkOff":"http://www.test.com",
  "imageUrl":"http://www.test2.com",
  "description":"Item description Item description.",
  "infoLink":"http://www.test.com",
  "shareLink":"http://www.test.com"
},
}
```

- 1.Item img: the img url is from `imageUrl`
- 2.Click on the Item img will redirect and the redirect link is from `linkOff`
- 3.ItemName: from `name`
- 4.ItemDescription: from `description`
- 5.Show info icon if `infoLink` exist
- 5.Show share icon if `shareLink` exist

I think you can just use `JSON.parse`  
then find a way to inflate the page with the content.

Will need a Mobile Version like this
